Saving the Seed: Genetic diversity and European agriculture (Natural Resource Management Set)

Renee Vellve

Genetic diversity is essential to the security of agriculture. Without the availability of a wide range of plant varieties and the genetic resources they contain, crops cannot adapt to combat the ever-changing threats of pests, diseases and climatic change. Yet, with the increasing industrialisation of modern agriculture, farming has become a business which centres on a handful of new, genetically similar 'super seeds'. Plants must evolve in order to survive, but modern agriculture has replaced diversity with uniformity, and security with vulnerability.

Saving the Seed traces the decline of crop varieties in European farming and describes what is being done to safeguard genetic resources for the future. Conservation efforts by government and industry suffer from serious drawbacks, with wrangles over ownership and control of resources. The crucial work is being done by individuals and grassroots organisations, who largely go unrecognised and under-resourced. What is urgently needed are sound policies to promote the diversification of agriculture and an integrated strategy for safeguarding the genetic base of our food system. *Saving the Seed* contains the most up-to-date information available on genetic resources in Europe and on those working to save them. Renee Vellve is a researcher at GRAIN, a no-governmental organisation working to promote the sustainable conservation and use of genetic diversity, based on grassroots approaches to genetic resources management. Originally published in 1992

From reader reviews:

Patricia Joyner:

Do you have favorite book? If you have, what is your favorite's book? Book is very important thing for us to be aware of everything in the world. Each publication has different aim as well as goal; it means that book has different type. Some people really feel enjoy to spend their time and energy to read a book. They can be reading whatever they consider because their hobby is usually reading a book. What about the person who don't like studying a book? Sometime, man feel need book after they found difficult problem or perhaps exercise. Well, probably you will want this Saving the Seed: Genetic diversity and European agriculture (Natural Resource Management Set).

Richard Crowe:

Throughout other case, little people like to read book Saving the Seed: Genetic diversity and European agriculture (Natural Resource Management Set). You can choose the best book if you love reading a book. So long as we know about how is important a new book Saving the Seed: Genetic diversity and European agriculture (Natural Resource Management Set). You can add expertise and of course you can around the world by a book. Absolutely right, because from book you can recognize everything! From your country until finally foreign or abroad you will be known. About simple point until wonderful thing it is possible to know that. In this era, we could open a book or searching by internet gadget. It is called e-book. You need to use it when you feel bored to go to the library. Let's study.

Clyde Traynor:

Nowadays reading books be a little more than want or need but also turn into a life style. This reading routine give you lot of advantages. The advantages you got of course the knowledge the particular information inside the book that improve your knowledge and information. The knowledge you get based on what kind of book you read, if you want send more knowledge just go with schooling books but if you want sense happy read one using theme for entertaining like comic or novel. The Saving the Seed: Genetic diversity and European agriculture (Natural Resource Management Set) is kind of e-book which is giving the reader erratic experience.

Michelle Garrett:

Many people spending their time period by playing outside with friends, fun activity having family or just watching TV all day long. You can have new activity to shell out your whole day by looking at a book. Ugh, ya think reading a book really can hard because you have to use the book everywhere? It all right you can have the e-book, bringing everywhere you want in your Smartphone. Like Saving the Seed: Genetic diversity and European agriculture (Natural Resource Management Set) which is keeping the e-book version. So , why not try out this book? Let's observe.
