Speech Recognition: The Future Now!

Speech Recognition: The Future Now!

This package shows users and developers how to take full advantage of PC-based speech recognition products. The pack, which includes a CD-ROM, introduces IBM's advanced VoiceType Dictation products, explains how they work, and presents the best applications for them. It includes more than 100 illustrations showing how IBM speech recognition works, and how it can be used. It also provides support for using IBM recognition technology in seven different national languages. The pack shows how to customize VoiceType Dictation for the needs of specific individuals or environments, and how the software can be used in different languages. It also helps readers to choose the right hardware and software platform for speech recognition. The pack can be used for PC users interested in speech recognition for individual use, and for business professionals seeking to improve their productivity. The editor, Michael Koerner, is a system engineer for IBM in Austin, Texas.
