Texture in Food: Semi-Solid Foods (Woodhead Publishing Series in Food Science, Technology and Nutrition)

Texture is one of the most important attributes used by consumers to assess food quality. This quality is particularly important for the growing number of semi-solid foods from sauces and dressings to yoghurt, spreads and ice cream. With its distinguished editor and international team of contributors, this authoritative book summarises the wealth of recent research on what influences texture in semi-solid foods and how it can be controlled to maximise product quality.

Part one reviews research on the structure of semi-solid foods and its influence on texture, covering emulsion rheology, the behaviour of biopolymers and developments in measurement. Part two considers key aspects of product development and enhancement. It includes chapters on engineering emulsions and gels, and the use of emulsifiers and hydrocolloids. The final part of the book discusses improving the texture of particular products, with chapters on yoghurt, spreads, ice cream, sauces and dressings.

With its summary of key research trends and their practical implications in improving product quality, Texture in food Volume 1: semi-solid foods is a standard reference for the food industry. It is complemented by a second volume on the texture of solid foods.

- Summarises the wealth of recent research on what influences texture in semi-solid foods and how it can be controlled to maximise product quality
- Reviews research on the structure of semi-solid foods and its influence on texture, covering emulsion rheology, the behaviour of biopolymers and developments in measurement
- Considers key aspects of product development and enhancement and includes chapters on engineering emulsions and gels and the use of emulsifiers and hydrocolloids

From reader reviews:

Christopher Mills:

This Texture in Food: Semi-Solid Foods (Woodhead Publishing Series in Food Science, Technology and Nutrition) book is absolutely not ordinary book, you have after that it the world is in your hands. The benefit you have by reading this book is information inside this guide incredible fresh, you will get info which is getting deeper a person read a lot of information you will get. This specific Texture in Food: Semi-Solid Foods (Woodhead Publishing Series in Food Science, Technology and Nutrition) without we understand teach the one who reading it become critical in pondering and analyzing. Don't be worry Texture in Food: Semi-Solid Foods (Woodhead Publishing Series in Food Science, Technology and Nutrition) can bring when you are and not make your handbag space or bookshelves' turn out to be full because you can have it within your lovely laptop even cellphone. This Texture in Food: Semi-Solid Foods (Woodhead Publishing Series in Food Science, Technology and Nutrition) having great arrangement in word and layout, so you will not sense uninterested in reading.

Paul Frazier:

Information is provisions for folks to get better life, information today can get by anyone with everywhere. The information can be a knowledge or any news even a problem. What people must be consider if those information which is from the former life are challenging to be find than now is taking seriously which one would work to believe or which one the resource are convinced. If you find the unstable resource then you buy it as your main information you will see huge disadvantage for you. All those possibilities will not happen with you if you take Texture in Food: Semi-Solid Foods (Woodhead Publishing Series in Food Science, Technology and Nutrition) as your daily resource information.

Frank Hudson:

Reading can called imagination hangout, why? Because if you find yourself reading a book especially book entitled Texture in Food: Semi-Solid Foods (Woodhead Publishing Series in Food Science, Technology and Nutrition) your brain will drift away trough every dimension, wandering in most aspect that maybe unidentified for but surely will become your mind friends. Imaging each and every word written in a guide then become one contact form conclusion and explanation that maybe you never get just before. The Texture in Food: Semi-Solid Foods (Woodhead Publishing Series in Food Science, Technology and Nutrition) giving you a different experience more than blown away your head but also giving you useful information for your better life within this era. So now let us demonstrate the relaxing pattern here is your body and mind will be pleased when you are finished looking at it, like winning a sport. Do you want to try this extraordinary paying spare time activity?

Brandi Johnson:
