## **Piper: A Model Genus for Studies of Phytochemistry, Ecology, and Evolution**

**Piper** is an economically and ecologically important genus of plant that includes a fascinating array of species for studying natural history, natural products chemistry, community ecology, and evolutionary biology. The diversification of this taxon is unique and of great importance in understanding the evolution of plants.

The diversity and ecological relevance of this genus makes it an obvious candidate for ecological and evolutionary studies, but surprisingly, most research on **Piper** spp. to-date has focused on the more economically important plants *P. nigrum* (black pepper), *P. methysticum* (kava), and *P. betle* (betel leaf). While this book does address the applied techniques of studying **Piper**, its focus is more on **Piper** in its natural setting. **Piper: A Model Genus for Studies of Phytochemistry, Ecology, and Evolution** synthesizes existing data and provides an outline for future investigations of the chemistry, ecology, and evolution of this taxon, while examining its key themes of **Piper** as a model genus for ecological and evolutionary studies, the important ecological roles of **Piper** species in lowland wet forests, and the evolution of distinctive **Piper** attributes.

This volume has a place in the libraries of those studying or working in the fields of ecology, evolutionary biology, natural products chemistry, invasive species biology, pharmaceuticals, and ethnobotany.

### **From reader reviews:**

#### **Crystal Freeman:**

Do you have favorite book? When you have, what is your favorite's book? Guide is very important thing for us to learn everything in the world. Each reserve has different aim or even goal; it means that publication has different type. Some people sense enjoy to spend their a chance to read a book. They are reading whatever they take because their hobby is reading a book. How about the person who don't like reading through a book? Sometime, person feel need book whenever they found difficult problem as well as exercise. Well, probably you will want this Piper: A Model Genus for Studies of Phytochemistry, Ecology, and Evolution.

#### **Mildred Ralph:**

The e-book with title Piper: A Model Genus for Studies of Phytochemistry, Ecology, and Evolution has lot of information that you can learn it. You can get a lot of help after read this book. This specific book exist new know-how the information that exist in this e-book represented the condition of the world at this point. That is important to yo7u to learn how the improvement of the world. This book will bring you with new era of the globalization. You can read the e-book on your own smart phone, so you can read that anywhere you want.

#### **Sandra Romero:**

People live in this new morning of lifestyle always make an effort to and must have the extra time or they will get lot of stress from both lifestyle and work. So , whenever we ask do people have time, we will say absolutely of course. People is human not really a robot. Then we ask again, what kind of activity do you have when the spare time coming to you of course your answer will certainly unlimited right. Then ever try this one, reading ebooks. It can be your alternative inside spending your spare time, often the book you have read will be Piper: A Model Genus for Studies of Phytochemistry, Ecology, and Evolution.

#### **Daphne Jones:**

As we know that book is essential thing to add our understanding for everything. By a guide we can know everything we really wish for. A book is a range of written, printed, illustrated or perhaps blank sheet. Every year was exactly added. This book Piper: A Model Genus for Studies of Phytochemistry, Ecology, and Evolution was filled in relation to science. Spend your time to add your knowledge about your technology competence. Some people has various feel when they reading a new book. If you know how big benefit of a book, you can feel enjoy to read a book. In the modern era like currently, many ways to get book that you wanted.
