As an addition to the European postgraduate training system for young neurosurgeons we began to publish in 1974 this series of Advances and Technical Standards in Neurosurgery which was later sponsored by the European Association of Neurosurgical Societies. This series was first discussed in 1972 at a combined meeting of the Italian and German Neurosurgical Societies in Taormina, the founding fathers of the series being Jean Brihaye, Bernard Pertuiset, Fritz Loew and Hugo Krayenbühl. Thus were established the principles of European co operation which have been born from the European spirit, flourished in the European Association, and have throughout been associated with this series. The fact that the English language is well on the way to becoming the international medium at European scientific conferences is a great asset in terms of mutual understanding. Therefore we have decided to publish all contributions in English, regardless of the native language of the authors. All contributions are submitted to the entire editorial board before publication of any volume. Our series is not intended to compete with the publications of original scientific papers in other neurosurgical journals. Our intention is, rather, to present fields of neurosurgery and related areas in which important recent advances have been made. The contributions are written by specialists in the given fields and constitute the first part of each volume.

**From reader reviews:**

**Patrick Adkins:**

This Advances and Technical Standards in Neurosurgery: 023 book is not ordinary book, you have it then the world is in your hands. The benefit you obtain by reading this book is information inside this publication incredible fresh, you will get info which is getting deeper anyone read a lot of information you will get. This kind of Advances and Technical Standards in Neurosurgery: 023 without we comprehend teach the one who studying it become critical in pondering and analyzing. Don't become worry Advances and Technical Standards in Neurosurgery: 023 can bring whenever you are and not make your carrier space or bookshelves' turn out to be full because you can have it in your lovely laptop even cell phone. This Advances and Technical Standards in Neurosurgery: 023 having great arrangement in word and layout, so you will not truly feel uninterested in reading.

**Jean Gadson:**

The feeling that you get from Advances and Technical Standards in Neurosurgery: 023 could be the more deep you searching the information that hide into the words the more you get thinking about reading it. It does not mean that this book is hard to know but Advances and Technical Standards in Neurosurgery: 023 giving you enjoyment feeling of reading. The author conveys their point in particular way that can be understood through anyone who read the item because the author of this guide is well-known enough. This particular book also makes your own vocabulary increase well. So it is easy to understand then can go to you, both in printed or e-book style are available. We advise you for having this Advances and Technical Standards in Neurosurgery: 023 instantly.

**Hattie Adkins:**

The guide with title Advances and Technical Standards in Neurosurgery: 023 has a lot of information that you can study it. You can get a lot of gain after read this book. This particular book exist new know-how the information that exist in this publication represented the condition of the world today. That is important to you to be aware of how the improvement of the world. This kind of book will bring you inside new era of the global growth. You can read the e-book on your own smart phone, so you can read that anywhere you want.

**Suanne Barnwell:**

Do you have something that you want such as book? The guide lovers usually prefer to decide on book like comic, limited story and the biggest an example may be novel. Now, why not hoping Advances and Technical Standards in Neurosurgery: 023 that give your fun preference will be satisfied by reading this book. Reading behavior all over the world can be said as the method for people to know world far better then how they react towards the world. It can't be mentioned constantly that reading routine only for the geeky

particular person but for all of you who wants to end up being success person. So , for all you who want to start reading as your good habit, you may pick Advances and Technical Standards in Neurosurgery: 023 become your current starter.
