Human-Computer Interaction: Gesture Spotting and Recognition Mahmud Elmezain, Ayoub Al-Hamadi

Even though automatic hand gesture recognition technology has been applied to real-world applications with relative success, there are still several problems which need to be addressed for wider applications of Human-Computer Interaction. One of such problems which arise in hand gesture recognition is to spot meaningful gestures from the continuous sequence of the hand motions. Another problem is caused by the fact that there is quite a bit of variability (i.e. in shape, trajectory and duration) in the same gesture even for the same person. Throughout literature, the backward spotting technique is used which first detects the end points of gestures and then tracks back through their optimal paths to discover the start points of gestures. Upon the detection of the start and the end points, in between points trajectory is sent to the recognizer for recognition. So, a time delay is observed between the meaningful gesture spotting and recognition. This time delay is unacceptable for online applications. Given the fact of high variability of corresponding gesture to other gestures, modeling the other gesture is a vital issue to accommodate the infinite number of non-gesture patterns.

From reader reviews:

Raymond McMillion:

The publication with title Human-Computer Interaction: Gesture Spotting and Recognition contains a lot of information that you can understand it. You can get a lot of advantage after read this book. This specific book exist new understanding the information that exist in this e-book represented the condition of the world now. That is important to yo7u to learn how the improvement of the world. That book will bring you in new era of the glowbal growth. You can read the e-book with your smart phone, so you can read this anywhere you want.

Sang Weems:

Many people spending their time period by playing outside together with friends, fun activity along with family or just watching TV all day long. You can have new activity to shell out your whole day by reading through a book. Ugh, do you think reading a book really can hard because you have to accept the book everywhere? It all right you can have the e-book, taking everywhere you want in your Cell phone. Like Human-Computer Interaction: Gesture Spotting and Recognition which is having the e-book version. So , why not try out this book? Let's notice.

Jean Gaskin:

You will get this Human-Computer Interaction: Gesture Spotting and Recognition by check out the bookstore or Mall. Only viewing or reviewing it can to be your solve problem if you get difficulties to your knowledge. Kinds of this publication are various. Not only by written or printed but in addition can you enjoy this book through e-book. In the modern era including now, you just looking because of your mobile phone and searching what their problem. Right now, choose your ways to get more information about your reserve. It is most important to arrange yourself to make your knowledge are still up-date. Let's try to choose right ways for you.

Lester Baker:

Book is one of source of expertise. We can add our understanding from it. Not only for students but in addition native or citizen have to have book to know the revise information of year in order to year. As we know those guides have many advantages. Beside most of us add our knowledge, can also bring us to around the world. By book Human-Computer Interaction: Gesture Spotting and Recognition we can get more advantage. Don't that you be creative people? Being creative person must prefer to read a book. Only choose the best book that suited with your aim. Don't end up being doubt to change your life with this book Human-Computer Interaction: Gesture Spotting and Recognition. You can more desirable than now.
