This introductory algebra text, based on standards in the AMATYC Crossroads document, motivates college math students to develop mathematical literacy and a solid foundation for future study in mathematics and other disciplines. This second book of a three-book series presents mathematical concepts and skills through relevant activities derived from real-life situations; these activities are meaningful to students because they illustrate how mathematics arises naturally from real-world situations and problems. The Mathematics in Action series is based on the assumption that students learn mathematics best by doing mathematics in a meaningful context. Students take an active role in their own learning by working in groups, thereby developing communication skills, a sense of independence, and a "can-do" attitude about mathematics. Technology is integrated throughout the book so that students learn to interpret real-life data numerically, symbolically, and graphically. Regardless of their level of preparation for the course, students can use this text to increase their knowledge of mathematics, their problem-solving skills, and their overall confidence in their ability to learn.

From reader reviews:

Judith Carter:

The book Mathematics In Action: An Introduction to Algebraic, Graphical, and Numerical Problem Solving (2nd Edition) will bring one to the new experience of reading a book. The author style to explain the idea is very unique. In case you try to find new book to read, this book very ideal to you. The book Mathematics In Action: An Introduction to Algebraic, Graphical, and Numerical Problem Solving (2nd Edition) is much recommended to you to see. You can also get the e-book from your official web site, so you can quickly to read the book.

Mary Infante:

The book untitled Mathematics In Action: An Introduction to Algebraic, Graphical, and Numerical Problem Solving (2nd Edition) contain a lot of information on the idea. The writer explains your ex idea with easy method. The language is very straightforward all the people, so do not really worry, you can easy to read the item. The book was written by famous author. The author will bring you in the new period of literary works. Barbara Norwood:

As we know that book is very important thing to add our understanding for everything. By a publication we can know everything we wish. A book is a group of written, printed, illustrated or maybe blank sheet. Every year ended up being exactly added. This e-book Mathematics In Action: An Introduction to Algebraic, Graphical, and Numerical Problem Solving (2nd Edition) was filled in relation to science. Spend your time to add your knowledge about your scientific research competence. Some people has distinct feel when they reading any book. If you know how big selling point of a book, you can truly feel enjoy to read a reserve. In the modern era like right now, many ways to get book that you just wanted.

Veronica Shriner:

As a college student exactly feel bored for you to reading. If their teacher asked them to go to the library or to make summary for some guide, they are complained. Just small students that has reading's heart or real their pastime. They just do what the educator want, like asked to the library. They go to right now there but nothing reading seriously. Any students feel that looking at is not important, boring in addition to can't see colorful images on there. Yeah, it is for being complicated. Book is very important to suit your needs. As we know that on this era, many ways to get whatever we really wish for. Likewise word says, ways to reach Chinese's country. So, this Mathematics In Action: An Introduction to Algebraic, Graphical, and Numerical Problem Solving (2nd Edition) can make you really feel more interested to read.
