At the edge of one of America's most defining eras in its history, salvation comes from the most unlikely source: video games. *Playin' To Win: A Surgeon, Scientist and Parent Examines the Upside of Video Games*, is inspired, in part, by many edgy titles that have previously probed the expanse of what could be. It is a *Freakanomics* with a more grassroots subject matter that elicits an instantaneous visceral response from citizens of every walk of life. It is an *Everything Bad Is Good For You* with grittier details on how the unexpected can be incorporated into raising our society to the next level. Ultimately, it makes a case that video games can promote a Tipping Point with a focus on contributing to real world solutions. It is direct, thought-provoking and consistently challenges perceptions of the boundaries of reality. It has to be! Because the readers will be the first to bear witness: this is a call for the start of a second American Revolution!
