Science, Worldviews and Education

Michael (Ed.) Matthews

Science, Worldviews and Education Michael (Ed.) Matthews

This anthology deals with the theme of 'Science, Worldviews and Education'. The theme is of particular importance at the present time as many national and provincial education authorities are requiring that students learn about the Nature of Science (NOS) as well as learning science content knowledge and process skills. NOS topics are being written into national and provincial curricula. Such NOS matters give rise to questions about science and worldviews: What is a worldview? Does science have a worldview? Are there specific ontological, epistemological and ethical prerequisites for the conduct of science? Does science lack a worldview but nevertheless have implications for worldviews? How can scientific worldviews be reconciled with seemingly discordant religious and cultural worldviews? In addition to this major curricular impetus for refining understanding of science and worldviews, there are also pressing cultural and social forces that give prominence to questions about science, worldviews and education. There is something of an avalanche of popular literature on the subject that teachers and students are variously engaged by. Additionally the modernization, and science-based industrialization, of huge non-Western, Asian societies whose traditional religions and beliefs are different from those that have been associated with orthodox science, make very pressing the questions of whether, and how, science is committed to particular worldviews. Hugh Gauch Jr, an agricultural scientist at Cornell University, contributed the volume's lead essay in which he says that questions about science's relation to worldviews, either theistic or atheistic ones, are among the most significant of contemporary issues for scientists, science teachers and culture more generally. The other authors include philosophers (Gürol Irzik, Robert Nola, Stuart Glennan, Hugh Lacey, Alberto Cordero), physicists who are also philosophers (Costas Skordoulis and Enrico Giannetto), a physicist with familiarity with the Islamic tradition (Taner Edis), a neuroscientist (Yonatan Fishman), a theologian (John Lamont), a biologist and science educator with theological training (Michael Reiss), and a science educator with philosophical training (Michael Matthews).

From reader reviews:

Angel Gardner:

What do you in relation to book? It is not important to you? Or just adding material when you want something to explain what the ones you have problem? How about your free time? Or are you busy man or woman? If you don't have spare time to perform others business, it is make you feel bored faster. And you have extra time? What did you do? Every individual has many questions above. They must answer that question simply because just their can do which. It said that about reserve. Book is familiar on every person. Yes, it is suitable. Because start from on jardín de infancia until university need this particular Science, Worldviews and Education to read.

Francine Nott:

Playing with family in a park, coming to see the sea world or hanging out with close friends is thing that usually you have done when you have spare time, then why you don't try issue that really opposite from that. I activity that make you not sensation tired but still relaxing, trilling like on roller coaster you have been ride on and with addition info. Even you love Science, Worldviews and Education, you may enjoy both. It is good combination right, you still wish to miss it? What kind of hang-out type is it? Oh seriously its mind hangout folks. What? Still don't have it, oh come on its referred to as reading friends.

Jason Serrano:

Do you like reading a e-book? Confuse to looking for your chosen book? Or your book had been rare? Why so many problem for the book? But just about any people feel that they enjoy to get reading. Some people likes reading through, not only science book and also novel and Science, Worldviews and Education or even others sources were given expertise for you. After you know how the truly great a book, you feel would like to read more and more. Science publication was created for teacher or students especially. Those guides are helping them to include their knowledge. In additional case, beside science book, any other book likes Science, Worldviews and Education to make your spare time more colorful. Many types of book like this one.

Barbara Saddler:

Reading a publication make you to get more knowledge from it. You can take knowledge and information from your book. Book is prepared or printed or outlined from each source that will filled update of news. In this particular modern era like now, many ways to get information are available for an individual. From media social such as newspaper, magazines, science reserve, encyclopedia, reference book, story and comic. You can add your understanding by that book. Are you hip to spend your spare time to open your book? Or just in search of the Science, Worldviews and Education when you required it?
