Table of Contents Introduction Chapter 1: Appearance Chapter 2: Behavior Chapter 3: Where and When Conclusion Author Bio Bonus Dinosaur Content Introduction to Dinosaurs Facts about Dinosaurs Dinosaur Extinction Dinosaur Fossils Dinosaur Eggs Dinosaur Names Dinosaur Diet Feathered Dinosaurs Plant Eating Dinosaurs The Weirdest Dinosaurs The Deadliest Dinosaurs Flying Dinosaurs Kinds of Dinosaurs The Biggest Dinosaurs The Smallest Dinosaurs Author Bio Publisher Introduction We are going to go on a journey back to the age of the dinosaurs to check out one of the strangest dinosaurs to ever have existed. That dinosaur is the Carnotaurus. The Carnotaurus is called a Carnotaur for short. The Carnotaurus was a strange creature because of the peculiar horns which grew from the top of its head and because of the many distinct characteristics it possesses that other similar dinosaurs did not have. For instance the Carnotaur was a lightly built predator whereas the t-rex was a large, bulking and heavy set predator even though both predators have tiny arms and walked on two legs. We are going to check out the reasons why the Carnotaur had the horns it had and we are going to check out all of its other nifty characteristics. It should be noted though that to appreciate dinosaurs properly, it takes more than just fossils and facts. One really has to have genuine wonder and interest in what the dinosaurs were- and this takes a bit of imagination. One really needs to understand that the dinosaurs were amazing creatures which came in all shapes and sizes and which really probably never exist again. That means we have to make images in our mind about how the dinosaurs looked, how they acted, and even how they smelled and what they sounded like. When you really imagine what the dinosaurs were you start to experience wonder and awe about just how mysterious and cool nature and earth really are. Now let's take a step back in time and walk with the dinosaurs!
