## **Making Sense of a Changing Economy: Technology, Markets and Morals** Edward J. Nell

In *Making Sense of Economics* Edward Nell presents an unorthodox and original view of the current state of economic theory and policies. Deriding the general trend for 'econobabble', the author explains the reason why conventional wisdom in economics now seems irrelevant and looks to likely future scenarios.

Entertaining throughout, Nell employs a lightness of touch and wit not generally associated with economic literature. It is an accessible and enjoyable read which requires minimal prior knowledge of economics. It will appeal to those who care what is really happening in the economy.
