Ship Modelling Solutions

Brian King

Ship Modelling Solutions Brian King

Brian King has earned an international reputation for the quality of his models, all built using skills initially learned during a 5-year craft apprenticeship when he acquired the basic practical skills in both wood and metal work. These skills, allied to a natural talent, have resulted in his very complicated models of large battleships from all eras. This book is a compilation of material originally published in the specialist hobby magazine *Model Boats* in which the master modeller has passed on many gems of experience to would-be builders of ship models, including anchors, gun barrels, portholes, decking, rudders, propellers, fittings; turrets; basic hulls; close-up on life saving gear; cowl ventilators; computers and modelling, photographing your models and working to dimensions. A lifetime of modelling experience is contained within these pages. There are few modellers, expert or novice, who will not benefit from this opportunity to read and learn. Previous books by Brian King include *Advanced Ship Modelling* (2000; 1-85486-122-0) and *Photo Etching* (2005; 1-85486-237-5).
