The Metrics of Science and Technology Eliezer Geisler

Dr. Geisler's far-reaching, unique book provides an encyclopedic compilation of the key metrics to measure and evaluate the impact of science and technology on academia, industry, and government. Focusing on such items as economic measures, patents, peer review, and other criteria, and supported by an extensive review of the literature, Dr. Geisler gives a thorough analysis of the strengths and weaknesses inherent in metric design, and in the use of the specific metrics he cites. His book has already received prepublication attention, and will prove especially valuable for academics in technology management, engineering, and science policy; industrial R&D executives and policymakers; government science and technology policymakers; and scientists and managers in government research and technology institutions.

Geisler maintains that the application of metrics to evaluate science and technology at all levels illustrates the variety of tools we currently possess. Each metric has its own unique strengths and weaknesses, but overall, metrics offer the best possible way to evaluate science and technology. He then finds that in general, science and technology have a positive effect on the human experience. Truly state of the art in the study of the metrics of science and technology, their outcomes and contributions to society and the economy, the book provides unique analyses of the academic world and its most useful metrics: the industrial science/technology research and development complex, and the government network of laboratories. For each, Geisler gives a comprehensive analysis of the main metrics and their best applications. His book is thus also usable in certain advanced undergraduate and graduate courses and seminars that treat technology and engineering management, project management in technology industries, and the evaluation of social and economic programs.

From reader reviews:

Mary Sexton:

In this 21st hundred years, people become competitive in every way. By being competitive now, people have do something to make these individuals survives, being in the middle of the crowded place and notice through surrounding. One thing that occasionally many people have underestimated it for a while is reading. That's why, by reading a reserve your ability to survive raise then having chance to stand up than other is high. To suit your needs who want to start reading a book, we give you this The Metrics of Science and Technology book as beginner and daily reading guide. Why, because this book is usually more than just a book.

Lauren Allison:

You may spend your free time to see this book this publication. This The Metrics of Science and Technology is simple to create you can read it in the park, in the beach, train along with soon. If you did not get much space to bring often the printed book, you can buy typically the e-book. It is make you better to read it. You can save the actual book in your smart phone. And so there are a lot of benefits that you will get when one buys this book.

Donald Noble:

Beside this The Metrics of Science and Technology in your phone, it might give you a way to get nearer to the new knowledge or information. The information and the knowledge you are going to got here is fresh in the oven so don't possibly be worry if you feel like an old people live in narrow village. It is good thing to have The Metrics of Science and Technology because this book offers to you readable information. Do you occasionally have book but you do not get what it's about. Oh come on, that won't happen if you have this in your hand. The Enjoyable set up here cannot be questionable, such as treasuring beautiful island. So do you still want to miss that? Find this book and also read it from right now!

William McCoy:

That book can make you to feel relax. This kind of book The Metrics of Science and Technology was colourful and of course has pictures on the website. As we know that book The Metrics of Science and Technology has many kinds or genre. Start from kids until young adults. For example Naruto or Investigation company Conan you can read and believe that you are the character on there. Therefore not at all of book are generally make you bored, any it can make you feel happy, fun and unwind. Try to choose the best book for you and try to like reading that will.
