Advances in Cellular Neurobiology: Volume 4 Sergey Fedoroff

Advances in Cellular Neurobiology, Volume 4 focuses on the central nervous system.

This book is divided into three main sections-cell differentiation and interaction, aging and pathology, and methodologies. The topics discussed include advances in the neurobiology of oligodendroglia; neuronal differentiation in reaggregate cell cultures; and morphological aspects of brain edema. The cell biological aspects of Down's syndrome; isolation and culture of cells of the dorsal root ganglia; and growth requirements of neural cells in vitro are also deliberated in this text.

This publication is intended for neurologists, but is also beneficial to students researching on the anatomy and functional relation of the brain and spinal cord.
