*Pavel Etingof, Frederic Latour*

## **The Dynamical Yang-Baxter Equation, Representation Theory, and Quantum Integrable Systems (Oxford Lecture Series in Mathematics and Its Applications)** Pavel Etingof, Frederic Latour

The text is based on an established graduate course given at MIT that provides an introduction to the theory of the dynamical Yang-Baxter equation and its applications, which is an important area in representation theory and quantum groups. The book, which contains many detailed proofs and explicit calculations, will be accessible to graduate students of mathematics, who are familiar with the basics of representation theory of semi-simple Lie algebras.

**From reader reviews:**

**Gary Bloomfield:**

The book *The Dynamical Yang-Baxter Equation, Representation Theory, and Quantum Integrable Systems* (Oxford Lecture Series in Mathematics and Its Applications) can give more knowledge and also the precise product information about everything you want. Why must we leave the great thing like a book *The Dynamical Yang-Baxter Equation, Representation Theory, and Quantum Integrable Systems* (Oxford Lecture Series in Mathematics and Its Applications)? A few of you have a different opinion about publication. But one aim which book can give many facts for us. It is absolutely appropriate. Right now, try to closer with the book. Knowledge or details that you take for that, you can give for each other; you may share all of these. Book *The Dynamical Yang-Baxter Equation, Representation Theory, and Quantum Integrable Systems* (Oxford Lecture Series in Mathematics and Its Applications) has simple shape but the truth is know: it has great and big function for you. You can seem the enormous world by wide open and read a reserve. So it is very wonderful.

**Lewis Tuggle:**

Spent a free the perfect time to be fun activity to perform! A lot of people spent their free time with their family, or their own friends. Usually they accomplishing activity like watching television, gonna beach, or picnic from the park. They actually doing ditto every week. Do you feel it? Do you want to something different to fill your current free time/ holiday? May be reading a book is usually option to fill your free of charge time/ holiday. The first thing you ask may be what kinds of e-book that you should read. If you want to try look for book, may be the publication untitled *The Dynamical Yang-Baxter Equation, Representation Theory, and Quantum Integrable Systems* (Oxford Lecture Series in Mathematics and Its Applications) can be excellent book to read. May be it might be best activity to you.

**Vicky Penn:**

Do you have something that that suits you such as book? The e-book lovers usually prefer to pick book like comic, quick story and the biggest one is novel. Now, why not trying *The Dynamical Yang-Baxter Equation, Representation Theory, and Quantum Integrable Systems* (Oxford Lecture Series in Mathematics and Its Applications) that give your fun preference will be satisfied through reading this book. Reading addiction all over the world can be said as the way for people to know world better then how they react to the world. It can't be claimed constantly that reading habit only for the geeky particular person but for all of you who wants to become success person. So , for all of you who want to start reading through as your good habit, you can pick *The Dynamical Yang-Baxter Equation, Representation Theory, and Quantum Integrable Systems* (Oxford Lecture Series in Mathematics and Its Applications) become your own personal starter.

**Pamela Wilson:**

Publication is one of source of information. We can add our expertise from it. Not only for students but also native or citizen need book to know the revise information of year for you to year. As we know those ebooks have many advantages. Beside we add our knowledge, also can bring us to around the world. By book *The Dynamical Yang-Baxter Equation, Representation Theory, and Quantum Integrable Systems* (Oxford Lecture Series in Mathematics and Its Applications) we can take more advantage. Don't you to be creative people? To be creative person must choose to read a book. Just simply choose the best book that ideal with your aim. Don't possibly be doubt to change your life at this time book *The Dynamical Yang-Baxter Equation, Representation Theory, and Quantum Integrable Systems* (Oxford Lecture Series in Mathematics and Its Applications). You can more inviting than now.
