Molly's journey starts as everyone's does, in the womb. In most memoirs the ten years after conception and birth are swiftly passed over, but here we see life from the beginning through the eyes of Molly, a small child grappling with the realities of life as she grows up in rural England at the end of the Second World War. She is a curious little detective, keen to find out as much as she can about life and love. For her, the shadows behind the doors only make sense in hindsight, and buried family secrets come to light as she struggles with the problem of how and who to be in the world. This is a story that examines the boundaries between memory and imagination, hope and illusion.
