Why do some countries' economies struggle to develop, even when they are the focus of so much research and international funding? While recognizing that the obstacles facing poor nations are many and complex, Rabie proposes that the roots of most obstacles are sociocultural; thus, sociocultural transformation and economic restructuring can only be successful when treated as interconnected, mutually beneficial objectives. *A Theory of Sustainable Societal and Economic Development* outlines an innovative model capable of identifying the major obstacles hindering poor nations' development in general, and the sociocultural and political obstacles in particular, placing them in their proper historical contexts, and addressing them comprehensively.
