Additives for waterborne Coatings (European Coatings Tech Files) Wernfried Heilein

Waterborne coatings are a growing market segment especially in the US, favored for their lack of toxic solvents and fumes. And the more recent waterborne products now closely emulate the properties and performance of their solvent-based equivalents. The use of waterbornes can reduce costs involved in removing noxious gases from the working environment and protecting staff from their effect. Equally they can eliminate the release of toxic gases in the locations where they are used, and the release of toxic substances into the environment via landfill disposal, etc.

There are special requirements relating to the use of additives in waterbornes, which are set out in this book. Issues such as adhesion are covered in detail.

The author team has provided a state-of-the art survey covering chemistry, functionality, binder technologies and coating types. For each of the major additive types the following key areas are covered: de-aeration, wetting, rheology control, adhesion, foam control, leveling, biocidal control, light stabilization, hydrophobic control, waxes.

- A reference guide to additives for waterborne paints and coatings for scientists and engineers involved in their formulation and use
- This guide will lead to the successful formulation of waterbornes with properties and performance comparable to solvent-based equivalents
- Essential information for compliance with workplace health & safety requirements and environmental regulations

From reader reviews:

Doris Edwards:

This Additives for waterborne Coatings (European Coatings Tech Files) book is absolutely not ordinary book, you have it then the world is in your hands. The benefit you will get by reading this book is definitely information inside this book incredible fresh, you will get info which is getting deeper anyone read a lot of information you will get. This particular Additives for waterborne Coatings (European Coatings Tech Files) without we comprehend teach the one who examining it become critical in thinking and analyzing. Don't possibly be worry Additives for waterborne Coatings (European Coatings Tech Files) can bring when you are and not make your case space or bookshelves' grow to be full because you can have it in your lovely laptop even phone. This Additives for waterborne Coatings (European Coatings Tech Files) having very good arrangement in word along with layout, so you will not sense uninterested in reading.

Ray Chung:

This book untitled Additives for waterborne Coatings (European Coatings Tech Files) to be one of several books that best seller in this year, that's because when you read this publication you can get a lot of benefit on it. You will easily to buy this book in the book store or you can order it by means of online. The publisher of this book sells the e-book too. It makes you quicker to read this book, as you can read this book in your Smart phone. So there is no reason to your account to past this publication from your list.

Lavone Anderson:

Reading can called mind hangout, why? Because when you find yourself reading a book mainly book entitled Additives for waterborne Coatings (European Coatings Tech Files) your thoughts will drift away trough every dimension, wandering in each and every aspect that maybe unfamiliar for but surely can become your mind friends. Imaging each word written in a book then become one form conclusion and explanation in which maybe you never get previous to. The Additives for waterborne Coatings (European Coatings Tech Files) giving you yet another experience more than blown away your head but also giving you useful data for your better life in this era. So now let us show you the relaxing pattern here is your body and mind are going to be pleased when you are finished examining it, like winning an activity. Do you want to try this extraordinary investing spare time activity?

Wayne Gaddis:

Your reading 6th sense will not betray an individual, why because this Additives for waterborne Coatings (European Coatings Tech Files) book written by well-known writer who really knows well how to make book that can be understand by anyone who read the book. Written inside good manner for you, dripping every ideas and publishing skill only for eliminate your own personal hunger then you still doubt Additives for waterborne Coatings (European Coatings Tech Files) as good book not simply by the cover but also with the content. This is one publication that can break don't evaluate book by its cover, so do you still needing a

different sixth sense to pick that!? Oh come on your examining sixth sense already said so why you have to listening to a different sixth sense.
