Social Networks and the Semantic Web: 5 (Semantic Web and Beyond)

Peter Mika

Social Networks and the Semantic Web: 5 (Semantic Web and Beyond) Peter Mika

Whether we changed the Web or the Web has changed us is difficult to discern, even with the wisdom of hindsight. Social Networks and the Semantic Web provides two major case studies. The first case study shows the possibilities of tracking a research community over the Web, combining the information obtained from the Web with other data sources, and analyzing the results. Social network mining from the Web plays an important role in this case study for obtaining large-scale, dynamic network data beyond the possibilities of survey methods. The second study highlights the role of the social context in user-generated classifications in content, such as the tagging systems known as folksonomies. Social Networks and The Semantic Web is designed for researchers and advanced-level students of the semantic Web and Web services, information systems, social and information sciences. This book is useful for practitioners in industry as well. Foreword by Frank van Harmelen, author of the Semantic Web Primer

Edwin Dulac:

With this era which is the greater person or who has ability in doing something more are more treasured than other. Do you want to become considered one of it? It is just simple way to have that. What you are related is just spending your time not very much but quite enough to possess a look at some books. On the list of books in the top checklist in your reading list is actually Social Networks and the Semantic Web: 5 (Semantic Web and Beyond). This book which can be qualified as The Hungry Inclines can get you closer in turning out to be precious person. By looking upwards and review this book you can get many advantages.

Richard Byrnes:

As a college student exactly feel bored to help reading. If their teacher questioned them to go to the library as well as to make summary for some guide, they are complained. Just tiny students that has reading's heart and soul or real their interest. They just do what the teacher want, like asked to go to the library. They go to there but nothing reading critically. Any students feel that looking at is not important, boring as well as can't see colorful photographs on there. Yeah, it is for being complicated. Book is very important for yourself. As we know that on this age, many ways to get whatever you want. Likewise word says, many ways to reach Chinese's country. Therefore , this Social Networks and the Semantic Web: 5 (Semantic Web and Beyond) can make you truly feel more interested to read.
