TDM des tumeurs abdominales (French Edition) Eric Delabrousse

Après le succès de l'ouvrage *TDM des urgences abdominales*, l'auteur s'attache ici à décrire de la manière la plus pratique et didactique possible la prise en charge des tumeurs abdominales au scanner.

Dans la première partie, le lecteur trouvera une **classification histologique générale des tumeurs**, des rappels sur **la technique TDM appliquée à l'étude abdomino-pelvienne**, un système de planches légendées présentant la **radio-anatomie** de façon multiplanaire ainsi qu'une **cartographie TDM relativement inédite des chaînes ganglionnaires abdomino-pelviennes**, et enfin les principaux éléments de **sémiologie TDM élémentaire** présents en pathologie tumorale abdominale.

Dans la seconde partie de l'ouvrage, une suite de **fiches pédagogiques** traitant des tumeurs abdominales est proposée au lecteur. Les tumeurs sont classées par organe puis selon leur caractère bénin ou malin. Pour chaque tumeur sont renseignés les principales données épidémiologiques, l'aspect en anatomo-pathologie, le contexte clinique, la sémiologie en TDM, l'intérêt des autres techniques d'imagerie, les principaux diagnostics TDM différentiels, l'évolution naturelle, le pronostic et les grandes lignes de prise en charge. Une liste d'items clés évocateurs du diagnostic est fournie pour chaque tumeur.

Cet ouvrage pédagogique, conçu comme un guide pratique, apportera à tous les radiologues, mais aussi à tous les médecins soucieux de se perfectionner dans l'imagerie de leur spécialité, une aide précieuse pour l'analyse et le diagnostic des tumeurs abdominales en TDM.
