Air Pollution Control Equipment Calculations Louis Theodore

Unique problem-and-solution approach for quickly mastering a broad range of calculations

This book's problem-and-solution approach enables readers to quickly grasp the fundamentals of air pollution control equipment and essential applications. Moreover, the author sets forth solid principles for the design and selection of air pollution control equipment as well as for its efficient operation and maintenance. Readers gain a deep understanding of both the equipment itself and the many factors affecting performance.

Following two introductory chapters, the book dedicates four chapters to examining control equipment for gaseous pollutants, including adsorption, absorption, and incineration equipment. The remaining six chapters deal with equipment for managing airborne particulate pollutants, including gravity settlers, cyclones, electrostatic precipitators, scrubbers, and baghouses. The appendix contains discussions of hybrid systems, the SI system (including conversion constants), and a cost-equipment model.

Each chapter offers a short introduction to the control device discussed. Next, progressively more difficult problems with accompanying solutions enable readers to build their knowledge as they advance through the chapter. Problems reflect the most recent developments in pollution control and include a variety of performance equations and operation and maintenance calculations. Each problem includes a statement of the problem, the data used to solve the problem, and a detailed solution. Readers may further hone their skills by visiting the text's Web site for additional problems and solutions.

This publication serves both as a textbook for engineering students and as a reference for engineers and technicians who need to ensure that air pollution control equipment operates efficiently and enables their facility to meet all air pollution control standards and regulations.

From reader reviews:

Tracie Berry:

Do you considered one of people who can't read enjoyable if the sentence chained inside straightway, hold on guys this aren't like that. This Air Pollution Control Equipment Calculations book is readable by simply you who hate the perfect word style. You will find the details here are arrange for enjoyable reading through experience without leaving also decrease the knowledge that want to provide to you. The writer involving Air Pollution Control Equipment Calculations content conveys the thought easily to understand by most people. The printed and e-book are not different in the written content but it just different such as it. So , do you even now thinking Air Pollution Control Equipment Calculations is not loveable to be your top list reading book?

Randall Briggs:

This book untitled Air Pollution Control Equipment Calculations to be one of several books in which best seller in this year, that's because when you read this e-book you can get a lot of benefit into it. You will easily to buy this particular book in the book retail store or you can order it by means of online. The publisher on this book sells the e-book too. It makes you easier to read this book, as you can read this book in your Mobile phone. So there is no reason to you to past this reserve from your list.

Diana Gum:

Are you kind of occupied person, only have 10 or perhaps 15 minute in your morning to upgrading your mind talent or thinking skill perhaps analytical thinking? Then you are receiving problem with the book in comparison with can satisfy your limited time to read it because all this time you only find book that need more time to be read. Air Pollution Control Equipment Calculations can be your answer given it can be read by an individual who have those short extra time problems.

Clyde Okane:

In this time globalization it is important to someone to acquire information. The information will make anyone to understand the condition of the world. The health of the world makes the information easier to share. You can find a lot of personal references to get information example: internet, magazine, book, and soon. You can view that now, a lot of publisher which print many kinds of book. Often the book that recommended for you is Air Pollution Control Equipment Calculations this guide consist a lot of the information on the condition of this world now. That book was represented how can the world has grown up. The dialect styles that writer value to explain it is easy to understand. The writer made some exploration when he makes this book. That is why this book suited all of you.
