IQM-CMM: Information Quality Management Capability Maturity Model (Ausgezeichnete Arbeiten zur Informationsqualität) Sasa Baskarada

Today, it is essential for organizations to pay greater attention to data and information, which must be considered as a valuable strategic resource. However, many organizations are challenged by determining the right way to improve the level of data quality. Sasa Baskarada presents a capability maturity model for information quality management process assessment and improvement. The author employed six exploratory case studies and a four round Delphi study to gain a better understanding of the research problem and to build the preliminary model, which he then applied to seven international case studies for further enhancement and external validation. The model is a set of evaluation tools and methodologies, which are intended to assist with the identification of relevant problems and solutions. Thus, the Information Quality Management Capability Maturity Model (IQM-CMM) may provide organizations with a measure of their maturity in information quality management, along with recommendations for increasing the level of maturity.
